

Hyacinth Vase Set

You can enjoy bright, cheerful blooms in a spectacular display that lasts for weeks - just add water! Forcing spring-flowering bulbs indoors is incredibly easy and an excellent way to brighten the cold, gray days of winter. Bursting into bloom shortly after planting, Hyacinths will delight your senses with their irresistible fragrance and rich color. Simply follow the instructions below and enjoy a colorful wintertime show that brings the scent of spring indoors!

Planting and care instructions: Fill the bottom half of the vase with water. Place the bulb on the top of the vase above the water, making sure the water level is not high enough to come into contact with the bulb. Add water as needed, keeping the water level at least 1/4 inch below the base of the bulb.

Place the vase in a cool, dark location. When the top of the bulb begins producing growth and the root system has extended into the water, move the vase into a warm area with low light intensity. As the flower opens, keep the plant in an area with bright, indirect light and temperatures of 60-65 degrees. Rotate the vase each day so the flowers remain upright instead of growing toward the light. Discard the bulbs once the blooms have faded.

Thank you for your order!

We warrant perennials for 1 year and annuals for 90 days from the time of the original shipment. If for any reason you are dissatisfied, we will replace your plant with a similar or comparable one, at no charge. If your replacement is not available or it is too late in the season to ship, it will reshipe the following shipping season.

If you have any questions or concerns about your order, please contact us at 888-593-3644 or help@cottagesfarmsdirect.com.

Caution: Do not assume any plant is safe to eat. Only parts of plants expressly grown to be eaten should be considered edible. As with any product that is not food, care should be taken to make sure that small children and pets do not ingest any part of the plant that is not expressly grown to be eaten.

Unless specifically stated, this product is intended for ornamental horticultural use only and is not intended for consumption or ingestion by humans or pets. Most plants are harmless, but some contain toxic substances which can cause adverse health effects. Furthermore, some individuals and some animals are sensitive or allergic to certain plants and precautions should be taken to limit or avoid physical contact with particular plants.

Some plants have thorns or spines that can be painful if handled.

In case of ingestion contact a poison control center immediately.
